Subject: for friday 9/15 bullets

Executive summary:

- 1) Include a summary of the DW/WW accomplishments (Kim Ngo will provide a statement this evening)
- 2) Include a summary of the Debris team (partnership with TCEQ Region 12 office) following TCEQ protocol. how many landfills and staging areas did they visit? What did they see (any issues)? Where did they visit?
- 3) Community Liaison staff any issues raised?
- 4) NPL sites - sampling completion
- 5) Ronnie – do you have anything to add as you leave the liaison position?

David wrote the following this morning:

- Drinking water and wastewater assessment teams are completing their emergency assessments of system and will depart. Restoration final systems and lifting of boil water notices will be overseen by TCEQ regional offices.
- EPA, TCEQ and Army Corps of Engineers field observation teams will inspect debris staging and landfill operations within the hurricane impacted counties in Texas to ensure best practices and program requirements are being met. A federal Debris Management Taskforce has been established at the FEMA JFO in Austin. EPA solid waste expert is participating on the Taskforce.
- Debris management programs to address the predicted high volumes of hurricane-damaged structures are a high priority. Asbestos NESHAP requirements for structures is being evaluated to determine if a No Action Assurance letter from EPA is necessary. (BY THE WAY – LISA PRICE IS WORKING THIS ISSUE AND MAY HAVE AN ANSWER ON WHETHER WER WILL

BE NEEDING A NO ACTION ASSURANCE LETTER FROM EPA.)
